

Do you need help using your smartphone, tablet, or computer? Cyber-Seniors' trained Tech Mentors are young people who teach technology to older adults.

They'll help you learn to:

- *set up a video call with friends and family*
- *order your groceries and medications and arrange for their delivery*
- *set up video appointments with medical professionals*
- *stream news, videos, music, and more*

Together, we can bridge the digital divide and help seniors stay connected
